Hi Tom,
Please find OSCP weekly report below. Please let us know if you have any questions.

EPA Announces Postponement of April TSCA SACC Meeting. In website and listserv announcements posted April 20, 2020, EPA announced that the Toxic Substances Control Act Science Advisory Committee on Chemicals (TSCA SACC) public virtual meeting to peer review EPA's draft risk evaluation for asbestos will be postponed. This meeting was originally scheduled for April 27-30, 2020. The Agency will issue another announcement once the new dates for this SACC meeting have been determined. The TSCA SACC provides EPA independent advice and recommendations on the scientific basis for risk assessments, methodologies, and pollution prevention measures and approaches for chemicals regulated under TSCA.

EPA Announces Next TSCA SACC Meeting. In website, listserv, and Federal Register announcements, planned for publication within the next week, EPA will announce that the Toxic Substances Control Act Science Advisory Committee on Chemicals (TSCA SACC) will meet May 26-29, 2020, to peer review EPA's draft risk evaluation for perchloroethylene. This will be a public virtual meeting, with participation by phone and webcast only, and there will be no in-person gathering for this meeting. The TSCA SACC provides EPA independent advice and recommendations on the scientific basis for risk assessments, methodologies, and pollution prevention measures and approaches for chemicals regulated under TSCA. At the meeting, the TSCA SACC will review EPA's draft risk evaluation and associated documents.

Hayley Hughes, DrPH, MPH, CSP

Howdy All,

Giving you a heads up. OSCP has two FACA items to send in.

Due to the fast changing natures of these announcements (one meeting is being delayed) we're in the process of nailing down the "articles."

Bear with us, we will be sending to you asap.
